

Interactive Sourcebook Features Guide

Choosing the Year(s) and Federal Judicial District(s):

The Interactive Sourcebook provides the user the ability to produce tables and figures for a particular sentencing year or set of years as well as for a particular federal judicial circuit or judicial district. Currently, the Interactive Sourcebook allows the user to generate tables and figures using data for fiscal years 2006-2011. To select the table or figure of interest, first go to the Table of Contents and click on the + sign next to the section headings to access the list of tables and figures available in the section of interest.

The screenshot shows the United States Sentencing Commission Interactive Sourcebook website. The header includes the USSC logo and the text "UNITED STATES SENTENCING COMMISSION". Below the header, there is a navigation bar with links: Home, Features, F.A.Q., and Contents. The main content area is titled "Interactive Sourcebook" and contains a sidebar with expandable sections: Introduction, Table of Contents, and Appendices. The "Table of Contents" section is expanded, showing a list of topics: Circuit and District Statistics, Primary Offense and Offender Characteristics, Sentencing Information, Guideline Application, Departures and Sentences Within the Guideline Range, Drug Cases, Immigration Cases, and New. A red arrow points to the "+" sign next to the "Table of Contents" heading. The "Tables and Figures" section is also visible, with a table listing topics and their corresponding Table/Figure Numbers.

Topic	Table/Figure Number*
+ Circuit and District Statistics	
+ Primary Offense and Offender Characteristics	
+ Sentencing Information	
+ Guideline Application	
+ Departures and Sentences Within the Guideline Range	
+ Drug Cases	
+ Immigration Cases	
+ New	

*Where the table/figure number is displayed, the interactive table matches the corresponding table in the printed USSC Sourcebook. Where there is no table/figure number, the table or figure is only available on the interactive website.
**The table is similar to the corresponding one in the printed USSC Sourcebook, but it has some methodological differences that affect some of the numbers.

For example, if the topic of interest is demographic information such as race, gender and age of offenders, select “Age, Race, and Gender of Offenders” which is Table 7 in the Commission’s *Sourcebook*.

¹ Of the 86,201 cases, 8,370 were excluded due to one or more of the following reasons: missing information on offender's race (8,356), missing information on offender's gender (2,013), or missing information on offender's age (405). Descriptions of variables used in this table are provided in [Appendix A](#).

A pop-up box will appear with a list of the fiscal years of data available along with a list of the federal circuits and districts. Note that the Interactive Sourcebook has a default setting that will always show data at the ***national level*** (i.e., all districts) for the ***most recent*** fiscal year data available.

To change the fiscal year of data, unselect the most recent fiscal year, then select the fiscal year or years of data by clicking the appropriate boxes. If more than one year is selected, the data from all the selected years ***will be aggregated***. To create a table or figure with data that is **NOT** aggregated, generate a separate table or figure for each year of interest. Creating a separate table or figure for each year will allow comparison of data over time.

Next, in the same pop-up selection box, the user can limit the information generated to a particular judicial circuit or district. The Interactive Sourcebook defaults to the “Circuit” option, however, by simply clicking on the circle next to the term “District,” the district selections will become available. Users *cannot* choose both circuit and district options, however, users *can* choose multiple circuits or multiple districts (e.g., users can choose Alabama Middle, Alabama North, and Alabama South to make a table of all of the judicial districts in the state of Alabama).

Sorting the Data:

The Interactive Sourcebook allows a user to sort data with specificity. For example, all of the tables by primary offense type default to the primary offense type order set forth in the Commission's *Sourcebooks*. The "sort function" enables users to sort information by the column of your choice (*e.g.*, total number of cases).

To sort the table, select the column of interest and click the up/down arrows next to that column heading. The sort options are "Natural Order", "Ascending Order", and "Descending Order." The Interactive Sourcebook default is "Natural Order," but that can be changed to either "Ascending Order" or "Descending Order" by clicking on the up/down arrow.

The screenshot shows the USSC Interactive Sourcebook interface. At the top, there are navigation links: Home, Features, F.A.Q., Contents, and Log Out. The main title is "GUIDELINE OFFENDERS IN EACH CIRCUIT AND DISTRICT¹". Below the title, it says "Circuits: none selected" and "Fiscal Years: 2011". There are three icons: a printer, a PDF icon, and a green checkmark. A red arrow points to the "N" column header in the table.

CIRCUIT	N	%
District		
TOTAL	86,201	100.0
D.C. CIRCUIT	365	0.4
Dist of Columbia	365	0.4
FIRST CIRCUIT	2,375	2.8

Massachusetts	570	0.7
New Hampshire	204	0.2
Puerto Rico	1,196	1.4
Rhode Island	212	0.2
SECOND CIRCUIT	4,634	5.4
Connecticut	342	0.4
New York (4)	4,129	4.8
Eastern	1,150	1.3
Northern	583	0.7
Southern	1,593	1.8

Vermont	163	0.2
THIRD CIRCUIT	2,966	3.4
Delaware	121	0.1
New Jersey	805	0.9
Pennsylvania (3)	1,978	2.3

The first time the up/down arrows are selected, the sort will change from Natural sort order to Ascending. If you are sorting on a district with Circuits and Districts (Ex. Table 2), the sort removes the hierarchy of the circuits and the state aggregations so that only districts will appear in the sorted table.
